

Moving bodies in visuolands

Rosário Durão (New Mexico Tech)

23 May 2016, 14:30h–17:30h

Faculdade de Letras da Universidade de Lisboa
Sala das TIC

In this talk, we will discuss the role of visualization and visual representation in the body-world(-technoscience) continuum, and the visual inscriptions of our moving bodies in space and across spaces.

Rosário Durão is Assistant Professor of Technical Communication at New Mexico Tech. She coordinates the *Humanizing Technology* project and directs its *Visualizing Science and Technology across Cultures* research project. She is the founding editor and current co-editor of *connexions • international professional communication journal*.

Activity organized within the MOV. MOVING BODIES:
ITINERARIES AND NARRATIVES IN TRANSLATION project, CITCOM group.
